

Pressure, Temperature, Level, Flow & Calibration

# Engineered Instrumentation for Ethylene Production

Smart in sensing

# WIKA has the industry expertise

Petrochemical plants place high demands on their measuring instruments. At various points in the process, they can be exposed to aggressive media, high pressures, and extreme temperatures.

From the most difficult applications to the routine, WIKA has the industry expertise and product capability to meet your site's greatest challenges.

## Available tests and certificates

- 2.2 test report
- 3.1 inspection certificate
- 3.1 material certificate
- DKD/DAkkS calibration certificate
- Climatic tests
- Shock and vibration tests
- Response time tests
- Pressure cycle tests
- Pressure strength and burst pressure tests
- IP-protection tests
- EMC-tests
- Dye penetrant testing
- X-ray testing of components
- Other national accreditation certifications

For 70 years, WIKA has continuously advanced instrumentation for pressure, temperature, level, flow and force measurement. Our broad selection of standard and custom solutions, as well as services, work to support operational safety, productivity and profitability. A global leader in lean manufacturing, WIKA can be your reliable partner anywhere in the world.

## Coil Outlet Temperature

Both fixed and retractable designs are engineered to meet the industry demands for repeatability and longevity. In addition to thermocouple designs for COT which have been specified and preferred by many of the top global ethylene producers, WIKA also provides solutions for bridge wall temperature, tube metal temperature, and burner flame rods.

## Level Measurement

Magnetic bypass level indicators allow for clear local indication as well as remote transmission of fluid levels. Each unit is precisely engineered to the fluidic properties of the process media.

## Flow Measurement

The HHR Flowpak provides accurate flow measurements without the typical straight run piping requirements. These are ideal for custody or inlet feed flow measurements in tight spaces.
