Hand-held pressure indicator, model CPH5000

Description

Extensive application possibilities

For the model CPH5000 hand-held pressure indicator, the model CPT5000 external reference pressure sensors with measuring ranges up to 1,000 bar [14,500 psi] and a model CTP5003 temperature probe with -196 ... +500 °C [-321 ... +932 °F] are available. Therefore, it is particularly suitable as a test instrument for applications such as process technology, machine building, etc. The digital indicator automatically detects the measuring range of the connected pressure sensor and guarantees a highly accurate pressure measurement.

Functionality

The CPH5000 can be used for measuring gauge and absolute pressure, as well as for differential pressure measurement and temperature measurement tasks. Various measuring units can be set on the instrument, and the LC display also offers a chart preview of the recorded measured data.

An integrated data logger and various other functions such as Min., Max., Hold, Tare, zero point correction, alarm, power-off, peak value detection, mean value filter, ensure that the CPH5000 can be used for many different applications. The large display with backlighting and a long battery life complete the special features of the CPH5000.

Software

In addition to the function as mass storage, the WIKa-Cal calibration software is available for calibration tasks and display of the logger data. WIKa-Cal also offers, over and above PC-supported calibration, the management of the calibration and instrument data in an SQL database. A USB-C interface is available for the data transfer.

WIKA-Cal calibration software

Easy and fast creation of a high-quality calibration certificate

WIKA-Cal calibration software serves for the creation of logger protocols or calibration certificates for pressure measuring instruments. The demo version is available for a cost-free download.

To switch from the demo version to a licenced version, a USB dongle with a valid licence must be purchased.

The preinstalled demo version changes automatically to the selected version when plugging in the USB dongle and remains available as long as the USB dongle is connected to the PC.

- The user is guided through the logger or calibration process
- Management of calibration data and instrument data
- Intelligent preselection via SQL database
- Menu languages: German, English, Italian, French, Dutch, Polish, Portuguese, Romanian, Spanish, Swedish, Russian, Greek, Japanese, Chinese
More languages are due with software updates
- Customer-specific complete solutions possible
- Maximum degree of automation in connection with our CPx series

The supported instruments are continuously expanded and even customer-specific adaptations are possible.

→ For further information, see data sheet CT 95.10

Two WIKA-Cal licences are available together with one hand-held

The WIKA-Cal calibration software is available both for reading the logger data stored in the hand-held as well as for online calibrations together with a PC. The scope of software functions depends on the selected licence. Several licences can be combined on one USB dongle.
