

FOR IMMEDIATE RELEASE

**Fast delivery of standard thermocouples, RTDs, thermowells made possible through new program from WIKA**

**HOUSTON, TX (November 2, 2016)** -- Because product needs can arise unexpectedly, WIKA has developed the Easy Order Guide program to deliver standard electrical temperature products in less than five days.

Through the program, customers can select from 10 electrical temperature products, including thermocouples, RTDs, thermowells and complete assemblies.

Ordering these standard configurations is simple thanks to preselected product codes and the quick order code builder. Scheduling and manufacturing of program orders has also been streamlined to ensure rapid delivery.

“WIKA USA developed the Easy Order Guide to meet the changing industry expectations,” said Brad Rennick, executive vice president of sales. “Once we establish the program with standard ETM products, we intend to expand it to other product lines as well.”
