

## **WIKAI Sensor Technology Certified to AS9100D Standard**

January 26, 2022

**Lawrenceville, GA – WIKAI Sensor Technology achieves stringent certification over a year ahead of planned schedule.**

The WIKAI Group's relentless focus on future technologies and opportunities has prompted many changes in the organization over the years. Most recently, our facility outside Columbus, Ohio has consolidated USA resources, knowledge, and production of products focusing on the aerospace and space industries.

One key aspect of this consolidation was becoming certified to the AS9100D standard in the Ohio facility, a more stringent standard than the existing ISO 9001 certification. The WIKAI Sensor Technology team worked with [BSI](#) to achieve the certification significantly ahead of the planned timeline of almost 2 years. Felix Brockmeyer, Vice President of Industrial Instrumentation, is proud of the team's accomplishment, saying "The WIKAI Sensor Technology team's efforts to achieve the standards required of this new certification means we are able to provide our aerospace customers with the design, performance, and quality they expect from products carrying the WIKAI name."

Becoming certified to AS9100D, combined with the investment the WIKAI Group is making into the [new state-of-the-art facility being built in Delaware County, Ohio](#), ensures that current and future aerospace customers will have a reliable, experienced partner in WIKAI Sensor Technology.
